Section 2: EX-99.1 (EXHIBIT 99.1)

Exhibit 99.1

Oxford Square Capital Corp. Announces Results of Operations for the Quarter Ended June 30, 2018 and Announces Quarterly Distribution of \$0.20 per Share

GREENWICH, CT – 07/31/2018 – Oxford Square Capital Corp. (NasdaqGS: OXSQ) (NasdaqGS:OXSQL) (“OXSQ,” the “Company,” “we,” “us” or “our”) announced today its financial results for the quarter ended June 30, 2018, and announced a distribution of \$0.20 per share for the quarter ending September 30, 2018.

- As of June 30, 2018, net asset value per share was \$7.56 compared with the net asset value per share as of March 31, 2018 of \$7.60, and a net asset value per share as of December 31, 2017 of \$7.55.
- For the quarter ended June 30, 2018 we recorded net investment income of approximately \$7.7 million, or \$0.15 per share compared with approximately \$8.7 million or \$0.17 per share for the quarter ended March 31, 2018. We recorded net realized losses of approximately \$1.0 million, and net unrealized appreciation of approximately \$0.3 million for the quarter ended June 30, 2018. In total, we had a net increase in net assets from operations of approximately \$6.9 million, or approximately \$0.14 per share, for the quarter ended June 30, 2018 compared with approximately \$11.5 million, or \$0.22 per share for the quarter ended March 31, 2018.
- Our core net investment income (“Core NII”) for the quarter ended June 30, 2018 was \$9.1 million, or approximately \$0.18 per share compared with approximately \$7.6 million or \$0.15 per share for the quarter ended March 31, 2018.
 - Core NII represents net investment income adjusted for additional cash distributions received, or entitled to be received (if any, in either case), on our collateralized loan obligation (“CLO”) equity investments and also excludes any capital gains incentive fees we recognize but have no obligation to pay in any period. **See additional information under “Supplemental Information Regarding Core Net Investment Income” below.**
 - While our experience has been that cash flow distributions have historically represented useful indicators of our CLO equity investments’ annual taxable income during certain periods, we believe that current and future cash flow distributions may represent less accurate indicators of taxable income with respect to our CLO equity investments than they have in the past. Accordingly, our taxable income may be materially different than either GAAP NII or Core NII.
- Total investment income for the second quarter of 2018 amounted to approximately \$12.5 million, which represents a decrease of approximately \$0.8 million from the first quarter of 2018.
 - For the quarter ended June 30, 2018, we recorded investment income from our portfolio as follows:
 - approximately \$5.9 million from our debt investments,
 - approximately \$6.1 million from our CLO equity investments, and
 - approximately \$0.5 million from all other sources.
- Our total expenses for the quarter ended June 30, 2018 were approximately \$4.8 million, up by approximately \$0.2 million compared to the first quarter of 2018. This increase is primarily attributable to higher professional fees.
- During the second quarter of 2018:

- We made investments of approximately \$87.9 million in corporate loan investments and \$0.9 million in CLO debt investments.
 - We received or were entitled to receive proceeds of approximately \$43.7 million from repayments and amortization payments on our debt investments, and \$0.2 million from sales of our CLO equity investments.
 - As of June 30, 2018, the following metrics applied (note that none of these values represent a total return to shareholders):
 - The weighted average yield of our debt investments was approximately 9.7% at current cost, compared with 9.9% as of March 31, 2018.
 - The weighted average effective yield of our CLO equity investments at current cost was approximately 14.5%, compared with 15.9% as of March 31, 2018.
 - The weighted average cash distribution yield of our CLO equity investments at current cost was approximately 18.0%, compared with 15.5% as of March 31, 2018.
-

- Our weighted average credit rating on a fair value basis was 2.0 at the end of the second quarter of 2018 (compared to 2.1 at the end of the first quarter of 2018).
- As of June 30, 2018, we had no investments on non-accrual status.
- On July 26, 2018, our board of directors declared the following distribution on our common stock:

Quarter Ending	Record Date	Payment Date	Amount Per Share
September 30, 2018	September 14, 2018	September 28, 2018	\$0.20

- On February 5, 2018, the Board of Directors authorized a stock repurchase program of \$25 million. Since inception of the program through June 30, 2018 we repurchased approximately 2.1 million shares of our common stock at a weighted average share price of \$6.41 per share totaling approximately \$13.3 million. Through June 30, 2018, our stock repurchase program has produced an accretion of approximately \$0.05 per share.
- On June 21, 2018, we announced that Oxford Square Funding 2018, LLC, a special purpose vehicle that is a wholly-owned subsidiary of the Company, entered into a credit facility (the “Facility”) with Citibank. Pricing under the Facility is based on 3-month LIBOR plus 2.25% per year. Pursuant to the terms of the credit agreement governing the Facility, we have borrowed approximately \$95.2 million. The Facility will mature on June 21, 2020.

Supplemental Information Regarding Core Net Investment Income

On a supplemental basis, we provide information relating to core net investment income, which is a non-GAAP measure. This measure is provided in addition to, but not as a substitute for, net investment income determined in accordance with GAAP. Our non-GAAP measures may differ from similar measures by other companies, even if similar terms are used to identify such measures. Core net investment income represents net investment income adjusted for additional cash distributions received, or entitled to be received (if any, in either case), on our CLO equity investments (excluding those cash distributions believed to represent a return of capital) and also excludes any capital gains incentive fees we recognize but have no obligation to pay in any period. The Company did not recognize any capital gains incentive fees for the quarter ended June 30, 2018.

Income from investments in the “equity” class securities of CLO vehicles, for GAAP purposes, is recorded using the effective interest method based upon an effective yield to the expected redemption utilizing estimated cash flows compared to the cost, resulting in an effective yield for the investment; the difference between the actual cash received or distributions entitled to be received and the effective yield calculation is an adjustment to cost. Accordingly, investment income recognized on CLO equity securities in the GAAP statement of operations differs from the cash distributions actually received by us during the period (referred to below as “CLO equity adjustments”).

Further, in order to continue to qualify to be taxed as a regulated investment company (“RIC”), we are required, among other things, to distribute at least 90% of our investment company taxable income annually. Therefore, core net investment income may provide a better indication of estimated taxable income for a reporting period than does GAAP net investment income, although we can offer no assurance that will be the case as the ultimate tax character of our earnings cannot be determined until tax returns are prepared after the end of a fiscal year. We note that these non-GAAP measures may not be useful indicators of taxable earnings, particularly during periods of market disruption and volatility and our taxable income may differ materially from our core net investment income.

The following table provides a reconciliation of net investment income to core net investment income for the three months ended June 30, 2018 and June 30, 2017:

	June 30, 2018		June 30, 2017	
	Amount	Per Share Amounts	Amount	Per Share Amounts
Net investment income	\$ 7,688,011	\$ 0.154	\$ 8,046,907	\$ 0.156
CLO equity adjustments	1,413,926	0.028	1,737,958	0.034
Core net investment income	<u>\$ 9,101,937</u>	<u>\$ 0.182</u>	<u>\$ 9,784,865</u>	<u>\$ 0.190</u>

We will host a conference call to discuss our second quarter results today, Tuesday, July 31, 2018 at 09:00 AM ET. Please call 1-888-339-0740 to participate. A replay of the conference call will be available for approximately 30 days. The replay number is 1-877-344-7529, and the replay passcode is 10122752.

A presentation containing further detail regarding our quarterly results of operations has been posted under the Investor Relations section of our website at www.oxfordsquarecapital.com.

The following financial statements are unaudited and without footnotes. Readers who would like additional information should obtain our Form 10-Q for the period ended June 30, 2018, and subsequent reports on Form 10-Q as they are filed.

-
- (1) Represents per share net investment income for the period, based upon average shares outstanding.
 - (2) Net realized and unrealized gains include rounding adjustments to reconcile change in net asset value per share.
 - (3) Management monitors available taxable earnings, including net investment income and realized capital gains, to determine if a tax return of capital may occur for the year. To the extent the Company's taxable earnings fall below the total amount of the Company's distributions for that fiscal year, a portion of those distributions may be deemed a tax return of capital to the Company's stockholders. The ultimate tax character of the Company's earnings cannot be determined until tax returns are prepared after the end of the fiscal year.
 - (4) Total return based on market value equals the increase or decrease of ending market value over beginning market value, plus distributions, divided by the beginning market value, assuming distribution reinvestment prices obtained under the Company's distribution reinvestment plan, excluding any discounts. Total return is not annualized.
 - (5) Total return based on net asset value equals the increase or decrease of ending net asset value over beginning net asset value, plus distributions, divided by the beginning net asset value. Total return is not annualized.
 - (6) Annualized.
 - (7) Portfolio turnover rate is calculated using the lesser of the year-to-date cash investment sales and debt repayments or year-to-date cash investment purchases over the average of the total investments at fair value.
